

Press Release

Denver, CO, January 20, 2010 – Industrial services provider Wazee Companies, LLC today announced that it has acquired the thriving business and assets of Washington based H&N Electric, a leading provider of repair, maintenance and overhaul services for critical motors and wind generators. From its offices in Pasco and Spokane, Washington, H&N Electric serves an extensive list of leading manufacturing, distribution, power generation, agriculture and wind farm customers in the western United States.

According to Trevor Armstrong, the President of Wazee (www.WazeeCo.com): “The addition of H&N Electric will significantly expand our wind generation maintenance capabilities, overhead crane/hoist sales and electric motor repair offerings.” Chris Donahue, manager of Wazee Wind said that “the H&N facilities will now support all wind services and in shop repairs in the western United States – enhancing our ability to service some of the largest wind farms in the world. With this acquisition, Wazee now has five locations throughout the West.”

“H&N Electric helps us continue to serve our customers on the West coast and will allow us to further expand our customer base between locations,” said Armstrong. “Since 1921 we have provided quality solutions to the industrial sector and by merging our skills and talents with H&N we will be able to give our customers one-stop shopping. For example, for our wind farm customers we now have 25 climb-trained technicians that cover a 15 state territory.”

H&N President and Founder Gary Naccarato said: “We are pleased to be part of the Wazee family, as they bring 90 years of heavy industrial knowledge to our business model.” In addition, their dedication to the same high standards of service that has been a hallmark of H&N for more than 50 years puts our combined operations in a leading position to continue to grow our market share in the western United States.”

Wazee said Naccarato will remain with the company, focusing his efforts on H&N’s wind sales and division general management. Naccarato has served as President of H&N for the past 33 years, during which time he has moved its Pasco, WA location into a new 22,000 sq. ft. facility and successfully expanded into the Spokane, WA market with a 12,000 sq. ft. repair facility. Naccarato will report to Trevor Armstrong of Wazee Companies.

H&N’s services, include repair of electric motors, failure analysis, electrical design and install, crane and hoist sales and a full service machine shop, as well as its leading position in repair and maintenance services to the growing wind market.

Denver, CO-based Wazee Companies, LLC provides electrical and mechanical solutions to aerospace, manufacturing, municipalities, mining, power generation, oil and gas and other heavy industrial customers through three business segments. *Wazee Crane* provides overhead material handling solutions with service and manufacturing capabilities to 120 ton and 110 foot spans. *Wazee Electric* provides electrical design and installation, electric motor and generator repair, and an outside field service group who provides predictive maintenance and onsite repair. And, *Wazee Wind* provides a wide range of wind turbine repairs including but not limited to generator, gearbox and electrical repair both up and down tower. Wazee Companies was nominated as one of the “Colorado Companies to Watch” and has grown from a single site with less than 35 employees to more than 100 employees in five locations in less than four years.
