

Crane Service Department

Our Crane Service department provides on-site service and diagnostics, and offers an extensive predictive maintenance program to ensure your material handling equipment is functioning at it's best.

Radio Control Installations

- Improve your existing crane control system with a radio control.
- These efficient and easy to use controls increase productivity, reduce costs, and enhance worker safety.

Did you know annual inspections are required by OSHA on all overhead bridge cranes & hoists?

Contact your Crane Service experts at Wazee to find out how your business can prevent downtime and save money.

24/7 service

VFD Drive Upgrades

- Installing a VFD drive can save your business money on operating cost by varying the load and motor speed.
- A motor that operates at a lower speed will consume less energy, which will reduce your electric bill.

Crane Load Tests

- We have 125 tons of test weight designed to eliminate the dangers of water bag testing.
- Our test system carries a PE stamp of design approval.
