

Motor Shop

Our experienced and qualified technicians are available 24/7 for both on-site and in-shop mechanical services. We use top-of-the-line and cutting edge technology to complement our years of experience in the field.

Large Motor Capabilities

- 20,000 sq foot motor shop.
- Our motor test stand is capable of 240VAC - 7,200VAC and 0-600 VDC. Our shop test equipment consists of 2 Baker Hi-Pot testing machines: a D12 and a D30R.
- Our core loss tester is a Lexesco 200Kva model 2200.
- Capability in excess of 20,000 horsepower.

Did you know most motor downtime can be avoided with a preventative maintenance program?

Contact **Wazee Electric** to find out how your business can save money and downtime expense.

More Services

- **Motor pick-up and delivery.**

VPI Tanks

VPI provides a 100% solid mass structure that gives you the greatest mechanical strength, a cooler running motor due to superior heat dissipation, and the highest level of environmental protection.

- VPI may be used for both AC and DC motor stators, armatures, field coils, and applications such as lifting magnets.

- VPI is superior to solvent and conventional "dip and bake" methods.

Your 1-Stop Motor Shop

Since 1921 we have been servicing the electric motor industry. Our experience and versatility allow us to uniquely serve our customers in all stages of motor repair: from on-site emergencies to complete in-shop rebuilds and delivery. We also have a full machine shop in house for custom solutions.
